

2012 American Control Conference

June 27 – 29, 2012

Montréal, Québec, Canada

www.a2c2.org/conferences/acc2012

Operating Committee

General Chair

Tariq Samad, Honeywell Automation and Control Solutions

Program Chair

Dawn Tilbury, University of Michigan

Vice Chair for Invited Sessions

Magnus Egerstedt, Georgia Institute of Technology

Vice Chair for Workshops

Stéphane Lafortune, University of Michigan

Vice Chair for Industry Activities

Greg Stewart, Honeywell Automation and Control Solutions

Vice Chair for Special Sessions

Camille Alain Rabbath, Defense Research and Development Canada

Registration Chair

George Chiu, Purdue University

Publications Chair

Kristi Morgansen, University of Washington

Finance Chair

Gary J. Balas, University of Minnesota

Local Arrangements Chair

Luis Rodrigues, Concordia University

Exhibits Chair

Benoit Boulet, McGill University

Publicity Chair

Meeko Oishi, University of British Columbia

Student Programs Chair

Francesco Borrelli, University of California, Berkeley

Important Dates

Deadline for all submissions and proposals:

September 15, 2011

Notification of acceptance / rejection:

January 31, 2012

Final submissions due:

March 15, 2012

Call for Contributions

The 2012 American Control Conference (ACC) will be held Wednesday through Friday, June 27 - 29, at the Fairmont Queen Elizabeth in Montréal. The conference will be the first ACC outside the United States.

The ACC is the annual conference of the American Automatic Control Council (AACC), the U.S. national member organization of the International Federation for Automatic Control (IFAC). Society members of AACC include AIAA, AIChE, ASCE, ASME, IEEE, ISA, SCS, and SIAM.

The ACC 2012 program will feature plenary and semi-plenary lectures, contributed and invited papers, and tutorial and special sessions. Several pre-conference workshops will be held. The conference will also feature theme tracks in aerospace systems and power systems.

Montréal, the UNESCO city of design and the second largest city in Canada, is a vibrant center of commerce, industry, culture, finance and world affairs. With its amazing, narrow streets, restored buildings, and old houses, as well as modern skyscrapers, theaters, museums, restaurants, and glittering nightlife, Montréal truly is Canada's "cultural capital." Montréal boasts an efficient and well coordinated urban transit system and the Montréal Métro is one of the most architecturally distinctive subway systems in the world. The Montréal Jazz Festival, the world's largest, will start on June 28 in 2012.

Submissions for the 2012 ACC program are invited in several categories.

Contributors are encouraged to consult the conference website and to contact appropriate organizing committee members for more information.

Contributed papers should present complete descriptions of finished work.

Invited session proposals should present topics from multiple viewpoints with a unifying theme. Each proposal should consist of a summary statement and six papers.

Special session proposals should highlight emerging research areas, industry and government initiatives, and other topics of broad interest.

Tutorial session proposals should address state-of-the-art control theory and industrial applications. Panel discussions are encouraged in tutorial sessions.

Pre-conference workshop proposals should focus on topics of current interest to the control community.

The conference's exhibits floor will showcase control-related publications, products, services, and demonstrations, and will be open to all organizations, public and private, with a control connection.

Contributions relating to the themes of aerospace systems and power systems are welcomed in all submission categories.

Submission and Registration Policies

All papers submitted to ACC 2012, whether for review or publication upon acceptance, must be written in English and formatted in the standard 2-column proceedings format.

For initial submissions, all regular and invited papers are limited to eight (8) pages. Please see the conference website for details of registration fee payment policies for uploading final versions of accepted papers.
